

FOR IMMEDIATE RELEASE

AIR-TRANSPORT IT SERVICES, INC. ADDS FORT LAUDERDALE-HOLLYWOOD INTERNATIONAL AIRPORT TO THE GROWING LIST OF AIRPORTS UTILIZING ITS FULLY INTEGRATED OPERATIONAL SYSTEMS AND INNOVATIVE PASSENGER PROCESSING TECHNOLOGY

February 23, 2010, Orlando, FL – Air-Transport IT Services, Inc. (AirIT), a key provider of diversified information technology products and services to the air transportation industry, today announced that they have been awarded a contract to provide their EASE common-use infrastructure platform solution and key operational systems to Fort Lauderdale-Hollywood International Airport. The total value of the multi-year engagement is nearly \$16 million (USD). This contract was awarded based on a solicitation to provide Fort Lauderdale-Hollywood with a new Airport Information Management System (AIMS).

AirIT's common-use airline check-in system, EASE (extended airline system environment), ultimately allows any equipped ticket counter or gate podium to be utilized by any airline operating on the system to use their own native airline applications. This added efficiency greatly reduces airline costs, making the decision to add or expand airport service more palatable. By shifting the burden of IT infrastructure deployment from the airline to the airport, the airport creates distinct competitive advantages that are quickly recognized by the airlines. The AirIT EASE infrastructure platform can also be configured to support generic airline common use applications that have been developed for the existing CUTE or CUPPS standards. AirIT will also be installing Common Use Self Service (CUSS) kiosks to augment the shared use passenger processing functionality in Fort Lauderdale-Hollywood.

In addition to delivering next generation passenger processing to the airport, AirIT will be installing a robust suite of fully integrated operational system tools to enhance airport efficiency and solidify the airport's reputation as a technology leader. This fully integrated solution will include an Airport Operational Database (AODB), Resource Management System (RMS) and Flight Information Display System (FIDS), including visual paging and advertising components. The deployment of these systems at Fort Lauderdale-Hollywood will greatly enhance operational performance and improve the overall passenger impression and traveling experience.

Betros Wakim, President and CEO of AirIT, appreciates the contemporary thinking being demonstrated by Fort Lauderdale-Hollywood and states, "In today's turbulent aviation environment, it takes technology to drive efficiency and lower costs. We are extremely excited to finally begin the AIMS implementation after an arduous selection process that stretched nearly three years. While the process was lengthy we

were proud to compete and prevail against industry technology leaders like SITA, ARINC and Ascent Technologies and small niche providers like Ultra Electronics, Airport 2020 and Infax, Inc. To have our fully integrated solution selected in this diverse field, further demonstrates the total value and differentiation that is evident in the AirIT methodology and single source solution. The airport's new capital construction coupled with this technology investment is allowing Fort Lauderdale-Hollywood to demonstrate their commitment to attract and maintain first-rate air service for their community and we are proud to play an active role in that endeavor."Mr. Wakim adds, "By including the EASE infrastructure platform as part of their AIMS solution, we are installing technology that will pay dividends today and far into the future. The solution represents what is simply the finest common-use technology available. Its demonstrated ability to support airlines proprietary IT environments, legacy common-use and the forthcoming CUPPS standard is unparalleled today."

About Air-Transport IT Services, Inc.

Air-Transport IT Services, Inc., with corporate offices in Orlando, Florida, offers airlines and airport IT systems that enable them to deliver, display, manage and employ information that improves operations, customer satisfaction and revenue generation. The company's airport operational, passenger processing and revenue management solutions are the most comprehensive offerings available to the global air transportation industry. In addition to its product offerings, AirIT also provides consulting services, networking and installation and 24 x 7 support. AirIT is proud to be one of the top 100 best companies to work for in Florida, according to Florida Trend Magazine's annual issue of "Florida's Best Companies to Work For."
